Objective

I am looking for a developer job (Frontend, Backend, or Full Stack) that offers the opportunity to develop new skills while strengthening those I already possess and contribute to your company's success.

Education

Al Balqa Applied University (Al Huson College)

- Bachelor of Computer Science (2.83 GPA)

Experience

IT Department Trainee – Irbid Electricity Company

Irbid – Rateb Albataineh St.

March 2023 – June 2023

Android Development, Java, Networks, Maintenance

- Completed a 3-month internship in the IT department, focusing on technical and development skills.
- Developed Android mobile applications using Android Studio and Java.
- Acquired foundational knowledge of computer networks and hardware maintenance.

Web Development Intern – NCIT Solution

Amman, Jordan – King Hussein St.

April 25, 2024 – May 25, 2024

Laravel, Tailwind CSS, PHP, MySQL

- Worked with Laravel and Tailwind CSS to develop responsive and modern web interfaces.
- Improved practical skills in PHP and GitHub through real-world project tasks.
- Received hands-on training in MySQL database design, querying, and integration with backend systems.

Backend Developer Intern – Ideal Innovation House

Amman, Jordan – Wasfi Al-Tall St. (Gardens)

December 2024 – May 2025

Node.js Backend Internship

- Gained practical experience in building websites using Node.js, Express, and databases.
- Enhanced soft skills and improved English communication through daily collaboration.
- Contributed to a complete full-stack project by the end of the internship.

Skills & Knowledge

Technical Skills

- **Mobile Development:** Android Studio, Java
- **Backend Development:** PHP, Laravel Framework
- **Frontend Development:** HTML, CSS, JavaScript, Bootstrap, Tailwind CSS
- **Modern Web Frameworks:** React, Next.js
- **Databases:** MySQL, SQL, DBMS Fundamentals
- **Tools & IDEs:** Git & GitHub, VS Code, IntelliJ, Visual Studio, Android Studio
- **Operating Systems:** Windows, Linux (Ubuntu)
- **Computer Science Concepts:** Data Structures and Algorithms

Personal Skills

- Problem solving and critical thinking
- Fast learner and self-motivated
- Teamwork and collaboration
- Time management and task prioritization
- Effective communication skills
- Adaptability to new technologies
- Attention to detail in coding and design
- Version control with Git and GitHub
- Continuous learning and online research skills
- Willingness to receive and apply feedback

Projects

Room Usage Optimization for University Timetabling

A web app developed in PHP to help universities optimize classroom usage and schedule courses.

Technologies Used: PHP, MySQL, HTML, CSS, JavaScript

Course Management and Real-Time Communication System

A web application developed during my internship at **NCIT Solution**. The platform allows course managers to:

- Manage users and assign them to specific learning courses.
- Track student participation and manage learning content.
- Communicate with users through a real-time messaging system for announcements and support.

Technologies Used: Laravel, Tailwind CSS, MySQL, WebSockets

Castaway Hunting Trip Booking

A website designed for booking hunting trips and managing past trips. The site allows users to book trips, manage their previous bookings, and view details of the trips they've participated in.

It also includes secure payment integration allowing users to pay for trips via **PayPal**.

Technologies Used: Laravel, Tailwind CSS, Blade, SCSS, LESS, JavaScript, PHP

🔗 **Visit the website**

Movie Review Platform

A dynamic web application built during my internship at **Ideal Innovation House** that allows users to:

- Browse and search for movies.
- Write and submit reviews with ratings.
- View reviews and ratings posted by other users.
- Add movies to a personal "Watch Later" list.
- Manage accounts with authentication and user sessions.

Technologies Used: Node.js, Express, MySQL, EJS, Tailwind CSS

Languages

- Arabic - Native
- English - Fluent in reading, writing, and speaking
